

Please, please open up the airwaves for the benefit of those who listen to and watch and need local news and information. Please limit ownership by the conglomerates that do not have community interests in mind. Please do not forget about the example set by the train derailment in Minot, news of which was impossible to convey on the local airwaves because no human being was available to interrupt the programming and issue a warning. Above all, the ruling in favor of deregulation would be patently undemocratic.

Thank you.
